Canadian Sphagnum Peat Moss

What is it? Sphagnum peat moss for growing media comes from the non-living, fibrous sphagnum moss that has partially decomposed in a bog. It's light and spongy and crumbles into small clumps.

What does it do? Peat moss has a remarkable ability to efficiently hold water and nutrients that may otherwise leach out of the soil. It is nature's best all-purpose soil conditioner, which is why Sun Gro adds it to all of its key potting mixes.
